**Radia s.r.l.** has always continuously sought the best supply of the Service, to continuously improve itself and to best meet the needs of Customers, in the context of activities related to:

**“ Design and manufacturing of movement systems and motion transmission”**

with particular interest in the automotive, truck and aerospace system.

To achieve this goal, the Management considered essential and of primary importance to implement a Quality Management System compliant with the UNI EN 9100:2018 regulation.

In order to achieve competitive business performance in the target market, Radia s.r.l. is committed to:

- ensure the involvement of all operational personnel through the implementation of quality systems certified according to the standards of the relevant sector, improve the work environment and the safety of work areas;
- identify and monitor stakeholder needs and expectations;
- meet the mandatory requirements of Customers and continuously improve the effectiveness of our Management System.

The organization sets as its priority objective the **Satisfaction of Customers** of every order and size, guaranteeing the highest degree of **professionalism** and **competence** in each service provided and being **transparent** towards Customers and Suppliers.

In relation to climate change, RADIA SRL is committed to minimizing the environmental impacts of its business, reducing energy consumption by also adopting green systems (photovoltaic panels), and activating all necessary measures to prevent environmental pollution.

	<b>QUALITY POLICY</b>  <b>M. QP</b>	<b>Revisione</b> <b>02</b>	
		<b>Data</b> <b>22.04.2026</b>	<b>Pagina</b> <b>2/2</b>

The objectives, issued on an annual basis, will be revised when changes occur, new work activities or technologies are introduced, and based on results verified with the final data.

This Quality Policy will be reviewed each year in the Management's Review in order to ascertain its continued suitability or whenever necessary following the introduction of new processes also on the basis of the defined objectives.

The review of the policy will be conducted on the basis of any changes that have occurred in the business context and related stakeholders and according to an approach based on the principle of **risk based thinking**.

The Policy will be communicated and disseminated through appropriate distribution to all company employees and interested external parties.
